

Company Presentation

ABTergo is an agency and production company founded 1951. We manufacture and sell products for the transportation and storage of liquid, gaseous and solid media. The product mix consists of a number of agencies and production in house. Our production and warehouse is located in Dalarna in our own factory facility in the municipality of Leksand. Our sales offices are located in Nacka outside Stockholm and in Molkom in Värmland.

Our Business Concept

"In the business area Industrial Supplies, we will offer high quality customized products for transport and storage of gaseous, liquid and solid media as well as technical advice and logistics services to business and industry to fill their need for secure systems for handling, storage and transport. Our competitiveness is based on major technical skills, customer orientation, a qualified extensive product range and high product quality.

The foundation of our profitability is to offer and provide cost-effective solutions for business and industry. "

Our Quality Policy

We will market products and services of such quality that they fully meet our customers' expectations.

Employees at all levels within the company must always deliver products and services in accordance with the expected quality. We shall, through prevention and continuous skills constantly strive to eliminate mistakes and thus maintain a continuously high quality level of our products and services.

Our Environmental Policy

We shall by determined efforts ensure that our operations and our products have no negative impact on our environment. We must always meet the demands placed on us from customers and through legislation.

Our environmental work is constantly evolving through education, information and close cooperation on environmental issues with both staff, suppliers and customers. In our production, we will endeavor to minimize the energy consumption and material consumption and recycling of waste from our operations.
